

LATISH CHARPE

Aspiring Data Analyst | AI & Data Science

latishcharpe35@gmail.com | 9096258112 | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

Data Science and AI undergraduate (dual-enrolled at MIT and IIT Madras) seeking a Data Analytics internship where I can apply skills in Python, SQL, and Power BI to turn raw data into actionable business insights. Experienced in building end-to-end analytics dashboards and data-driven applications, with a strong foundation in statistics and visualization. Eager to contribute to a data-first team and grow through real-world analytical challenges.

EDUCATION

B.Tech in Artificial Intelligence & Data Science	2023 – 2027
<i>Maharashtra Institute of Technology, Chhatrapati Sambhajanagar</i>	
BS in Management and Data Science	2024 – 2028
<i>Indian Institute of Technology, Madras</i>	

TECHNICAL SKILLS

- **Programming & Analysis:** Python, SQL, Data Analysis, Pandas, NumPy
- **Visualization & Reporting:** Power BI, Matplotlib, Seaborn, Microsoft Excel, Presentation Design
- **Web & Databases:** HTML, CSS, MySQL
- **Tools & Platforms:** GitHub, Google Cloud, Jupyter Notebook

SOFT SKILLS

Time Management | Teamwork | Creativity | Problem Solving | Patience

PROJECTS

IPL Match Analysis Dashboard <i>Power BI</i>	2025
• Analyzed 500+ IPL matches across 10+ seasons to uncover team performance trends, win percentages, and player statistics. • Built interactive visuals highlighting top run-scorers, strike rates, and head-to-head team comparisons for data-driven cricket insights. • Designed a clean dashboard layout enabling stakeholders to filter by season, team, or player in real time.	
Technologies: <i>Power BI</i>	
MedStore – Medical Store Management System <i>Python, SQL, HTML, CSS</i>	2025
• Developed a full-stack digital system managing inventory of 200+ medicine SKUs, automating billing and customer record-keeping. • Implemented real-time stock-level tracking with low-inventory alerts, reducing manual stocktaking effort significantly. • Designed an intuitive UI enabling non-technical store staff to operate the system with minimal training.	

Technologies: *Python, SQL, HTML, CSS*

HMS – Hospital Management System | *Python, MySQL, HTML, CSS* 2025

- Built a multi-module system handling patient registration, doctor scheduling, and appointment management for a simulated hospital.
- Integrated a MySQL backend to store and query patient records efficiently, improving data retrieval over manual methods.
- Developed organized modules for hospital data management, reducing administrative overhead digitally.

Technologies: *Python, MySQL, HTML, CSS*

HACKATHONS & ACHIEVEMENTS

- **Gen AI Exchange Hackathon** — Google Cloud + Hack2Skill: Participated in a national-level generative AI hackathon, building an AI-powered solution using Google Cloud tools.
- **SIH 2025 Internal Hackathon** — MIT Chhatrapati Sambhajanagar: Competed in the Smart India Hackathon internal round, developing a tech solution for a real-world problem statement.

CERTIFICATIONS
